

Utterly Un-Put-Downable!! Wow, I loved this book. First off, the title - a play on the Tower of Babel, which is Biblical and I couldn't think of a better way to describe this book! So in the future, people don't learn languages - they are implanted and streamed. So when a streaming service is hacked, people become feral - not being able to communicate or run their voice activated devices. This was a page turner from the very first page. I loved the characters and the plot was so unique and fun. I can't wait for this series to continue!! Also, I love that the author has a PhD in linguistics - how awesome is that!?!
