

My Review

In the beginning, I did struggle a bit to find my footing with this book. It took a while before I found myself fully engaging with the story and the characters. However, once that happened, it was like a light bulb turning on. From that point on, I could not stop reading. This book was giving me Black Mirror vibes. That show not everything makes sense but at the same time it does. it makes you really think. that is what speculative fiction does.

Ebba and Emyr are two complete opposites, but they work well together. Ebba believes in technology and therefore has a more open mind, whereas; Emyr questions things with an analytical mind. They work well together due to the balance. You have to have checks and balance or there will be chaos. I look forward to what Mr. Evans comes out with next. The characters in this book may speak different languages but they all say to not miss this book!
